## JSB PELLETS SCHAK DIABOLO

Characteristics: They are offered in the same weight variations as the Diabolo Match pellets (light, middle and heavy weight). You can distinguish them easily according to the tape color, which is used to fix a lid, and with the color of the label on the bottom of each box. (green - light, yellow -middle, blue - heavy). It is possible to order them in various diameters (see Match). The only difference to the Match products is the speed of the check out control which is done faster than for the Match pellets.

For this reason the SCHaK products may be offered at a better price. An ideal choice for training!

PRODUCT CODE	GRAMS	GRAINS	QUANTITY
1045-500	0.475-0.535	7.33-8.26	500

## JSB PELLETS TARGET SPORT DIABOLO .177

Characteristics: Simply the best offer when it comes to ratio Quality vs. Costs. The technology and manufacturing process is identical to our Match Series. However the quality control is limited to randomly selected pieces. An ideal choice for beginners and shooting clubs.
