GUNSMITHING

GRS STOCKS BERSERK

SPECIFICATIONS

- The material is a 15% fiberglass reinforced Durethan.
 - The composite stock will be made in one size, black colour and in right hand configuration only.
 - The grip and forend is 5% slimmer than the Sporter varmint.
- LOP 33,5- 36,5cm. This size and LOP is the ideal based on the feedback we get from end users.
 - The surface under the rear stock has been lengthened so it will work better with the use of rear bags during prone shooting with bipods.
- The grip and fore end has rubber grip surfaces for better friction in wet conditions. The surface of the rest of the stock is also with a texture so it is very easy to grip.
 - The stocks will have pillar bedding in them as a standard made from 65% glass.
 - They come with flush cup sling mounts and push button sling loops.
 - They will have one sling mount on the front stock for mounting bipods.
 - Weight is 1,4kg in the Tikka T3 inlet.
- The height adjustable recoilpad can be mounted as well (optional extra feature!).

We have planned to manufacture composite stocks for a long time, but we have not had the time and resources to do so until now. We feel Berserk stocks will be a perfect addition to our existing product line. The reason we want to deliver these stocks is that we know the end users have asked GRS about synthetic stocks since we started with the laminate stocks in 2012. A lot of end users would like to have our ergonomic and adjustable features, but they want them to come in a more tough and durable material than the laminate. This product will also be in a lower price range and it comes in right hand configuration only. Adjusted dimensions in the grip, fore end and length will fit most people. The rubber grip and fore end surfaces give you a firm grip even in wet conditions. The stock comes with pillar bedding blocks made from 65% glass fiber as standard. Recommended torque is 5nm.

AVAILABLE IN THE FOLLOWING INLETS:

- Tikka T3 (all Calibers)
 - Howa 1500 SA
- Weatherby Vanguard SA
 - Remington 700 BDL (short and long action)
 - Savage 12 and 16

GRS STOCKS SAFARI

SPECIFICATIONS

- Oiled finish
 - 1" Limbsaver recoil pad
 - Birch laminate
- Adjustable cheekpiece
 - LOP 37,5cm
 - Total length 81cm
 - Fore end width 52mm
- Quick detachable slingmounts
 - Glass bedding recommended
 - Weight 1500 grams (+- 10%)
 - RH stocks only
 - Available in 6 Colours

In February 2014 we started offering our GRS Safari stocks. Rifles from 375H&H and up need a strong and functional platform. Our stocks are designed for shooting with open sight or low mounted riflescopes - and specifically with dangerous game hunting in mind. We shoot rifles in 375H&H, 458Winmag, 470 and 500 Nitro Express- so we know what recoil demands from stocks. The stock is made from laminated wood, with a 1" Limbsaver recoil pad which dampens the recoil very well. Flush cup slingmounts and quick detachable 3/4" sling loop is delivered with the stock as standard.

PRODUCT CODE	MODEL	COLOUR	SIDE
101776	CZ 550 Mag	Brown	Right handed

GRS STOCKS ADJUSTABLE HUNTING

SPECIFICATIONS

- Oiled finish
- 0.5" Limbsaver/GRS recoil pad
 - Birch Laminate
- SpeedLock adjustment
 - LOP 35-38cm
 - Total length 77cm
 - Fore end width 59mm
- 30mm adjustment LOP and cheekpiece
- Weighs 1400grams (+ - 10% depending on weapon inlet)
 - Glass bedding recommended.
- Same price for RH and LH stocks!
 - Available in 6 colours
 - Varmint barrel contour

Taking the features from the Sporter- Varmint stock, we created a solution for the hunter wanting a adjustable riflstock with more classic lines. The forend is broader than a standard stock, and gives you very good control of the rifle when aiming and shooting. The grip has a six degree angle to the side to aid the shooter into an ergonomically correct position. The comb and the recoil pad can be easily adjusted with pushbuttons - the SpeedLock system. This unique system allows you to quickly adjust the length and height of the stock between shooting positions; no tools needed! At the lowest comb position any bolt can be pulled from any system. Both the comb and recoil pad can be fully removed. All stocks is provided with a 0.5" Limbsaver/GRS recoil pad.

GRS STOCKS DECIMA HUNTER

SPECIFICATIONS

- Oiled finish
- 0.5" Limbsaver/GRS recoil pad
 - Birch Laminate
- SpeedLock adjustment
- 30mm adjustment LOP and cheekpiece
 - LOP 32-35cm
 - Total length 74,5cm
 - Fore end width 49mm
- Weighs 1300grams (+ - 10% depending on weapon inlet)
 - Glass bedding is recommended.
- Same price for RH and LH stocks!
 - Available in 6 colours
 - Varmint barrel contour

This riflestock is made as a direct answer to our customers who wanted a shorter LOP and slimmer grip.

The Decima stocks is scaled down 10% and the length of pull is now from 32 to 35cm, the grip and forend is also 10% slimmer on this model.

The stock is made with the same quality components as the other stocks, and has the same Speedlock adjustments system. It is also made in the 6 colours.

GRS STOCKS SPORTER / VARMINT

SPECIFICATIONS

- Oiled finish
- 0.5" Limbsaver/GRS recoil pad
 - Birch Laminate
- SpeedLock adjustment
 - LOP 35-38cm
 - Total length 77cm
 - Fore end width 59mm
- 30mm adjustment LOP and cheekpiece
- Weighs 1400grams (+ - 10% depending on weapon inlet)
 - Glass bedding recommended.
- Same price for RH and LH stocks!
 - Available in 6 colours
 - Varmint barrel contour

This rifle stock is tailor made for competition shooting. A full and lowered forend gives a good grip and helps improve the standing shooting position. The grip has a six degree angle to the side to aid the shooter to an ergonomically correct position. The comb and the recoil pad can be easily adjusted with pushbuttons - the SpeedLock system. This unique system allows you to quickly adjust the length and height of the stock between shooting positions; no tools needed! At the lowest comb position any bolt can be pulled from any system. Both the comb and recoil pad can be fully removed.

- Comes with quick detachable slingmounts and sling mount for harris bipod
 - Glass bedding recommended
- Same price for RH and LH stocks!
 - Available in 6 colours
 - Bull barrel contour

Years of personal civilian and military long range shooting experience lies behind the design of this stock. No compromises! The design is derived from the long range stock, with the same grip and SpeedLock system. The butt has a surface specially made for shooting with a beanbag, this is the absolute best way to shoot accurate on extended ranges. The forend is 50 mm longer than a sporter/varmint style stock and has a flat bottom for supporting against bags or rests. The longer forend also provides a better mounting position for bipods and aids in balancing long and heavy barrels. The forend has one quick detachable slingmount and one sling mount for using a Harris style bipod is provided as standard. The stock is predrilled for the VersaPod spigot (installation required) The buttstock also has a QD slingmount.
